BEInfratek Offers an easy to deploy interactive system that gives the visitors the ability to find the information / map of stalls & exhibitors and nearby tourist attractions, hotels, shopping zones, transportation, etc and transfer it to their Bluetooth enabled phones. The maps are customized to display the directions of places so that the visitors can be guided accurately & conveniently to their destinations.

"It is an ambitious project for Delhi and will be of great help to tourists who will be coming in for the Games,"

Source: The Times of India

"With the installment of the screens, there would be less fleeing incidents done by taxi and auto rickshaw drivers"

Source: The Tribune

"The screen will be helpful not only to the visitors but also for the general public of India"

Source: Navbharat Times

"With such touch screen kiosks placed in delhi streets, it will be easy for the not only the tourists, but others too to get useful information"

Source: Sahara News
